

Dear Parents/Guardians,

Re: Concerns over new social media app, ASKIP

It has come to our attention that some of our students have access to an app called ASKIP on their mobile devices. We are concerned about this app because it allows people to message others anonymously and we fear that this leaves our young people vulnerable. In addition, the owners and app stores all recommend that users of ASKIP are 17 and over.

As a school, we recommend you check your son/daughter's phone for this app and encourage them to delete it if they do have it. It would also be beneficial to have regular conversations with your children about staying safe on social media.

Kind regards,

Mrs N.Whitham and Mr D. Sweet
