

AW/CMA

8th April 2019

Dear Parents/Guardians,

I would like to invite you to a parents information evening on **Thursday 11th April 5-5.30pm in the school Library-access from the front of the building**. The purpose of this evening is to look at the upcoming external exams and how you could support your child over the next few months.

All year 10 students have at least 4 external exams in English Literature, Biology, Chemistry and Physics with the possibility of History, Religious Education and ICT. These make up a significant percentage of their final overall grades so it is important that students fully prepare for them. The evening will give you a chance to look at the topics the students are covering in their GCSE courses. Alongside this it will also provide you with the opportunity to look at the types of examination questions your son or daughter can expect, in particular the significant shift in emphasis on literacy and skills.

If you are able to attend please could you confirm with the school reception on 01492 864200.

I hope it will be an informative and helpful evening and I look forward to meeting you all.

Yours faithfully

Mrs N Whitham
Director of Learning (year 10)
